

Problem Statement

Two organizations Adventure Works and Wide World Importers database are heading for merger.

The products, customers and sales data of these two organizations have to be merged.

Create the following 3 pipeline in an ADF project using AdventureWorks and WideWorldImporters database. All necessary attributes of the products, customers and sales data have to be imported into a target database which is to be created.

1. Create a pipeline to get Product data from AdventureWorks and WideWorldImporters database.
2. Create a pipeline to get Customer data from AdventureWorks and WideWorldImporters database.
3. Create a pipeline to get Sales data from AdventureWorks and WideWorldImporters database.

Make all necessary assumptions as possible.
